

HMAA In-Network Mammography Imaging Centers

Mammograms are covered benefits under an HMAA health plan. Generally, one mammogram per calendar year is covered for women ages 40 and older. Coverage exclusions or limits may apply.

You may schedule an appointment at a mammography center since a physician referral is not required. Please verify participating locations with your provider before you obtain services as this list is subject to change at any time. For more information, contact the provider or visit their website.
